Schedules

- Number, type and Distribution of Potential units in Draft Plans of Subdivision registered between October 31, 2006 and October 31, 2007.
- 2 Summary of 2008 Post 2009 Proposed Registration
- 3 Draft Plan Approval Activity (includes Plans that were Draft Approved in 2007 and Plans anticipated to be considered for Draft Plan Approval in 2008)
- 4 Summary, Draft Approved and Preliminary Plans (Northeast, Northwest and South including map)
- 5 Building Permits for new Residential Units by Dwelling Unit Types as of October 31, 2007.
- 6 Residential Construction Activity by Unit Type, City of Guelph 1985 to 2007.
- 7 Table 1: Potential Development Summary Short, Medium and Long Term, October 31, 2007.
 - Table 2: Building Permits and Vacant Lots by Registered Plan of Subdivision
 - Map 1: Remaining Units by Registered Plan of Subdivision
 - Map 2: Infill Townhouse and Apartment Sites
- 8 3rd Quarter Updates on Wastewater Treatment Plant Flows and Water Treatment Flows
- 9 Total Draft and Registered Plan Analysis
- 10 Written Responses to the Draft DPP
- 11 Staff Response

1 INTRODUCTION

The Development Priorities Plan (DPP) is prepared annually by Community Design and Development Services with the assistance of the Finance Department. The first annual DPP was prepared in 2001 as a recommendation from a study of the Development Services function of the City undertaken by Arthur Anderson in 1999.

The DPP is intended to manage the rate and timing of development in the City. The DPP provides a multi-year forecast of development activity as measured by the anticipated registration of draft plans of subdivision. The preparation and approval of the DPP is in keeping with one of the goals of the 'City of Guelph Strategic Plan 07 and beyond – The city that makes a difference' being "An attractive, well-functioning and sustainable city". Through the recommendations in the DPP, City Council establishes priorities for the planning and development of future growth areas.

Other objectives of the Plan, as amended in July 2007, include:

- 1. To manage the rate and timing of development in the City through a multi-year forecast of development activity as measured by the anticipated registration of draft plans of subdivision.
- 2. To outline the municipal intentions with respect to the review, processing and servicing of plans of subdivision (residential and industrial).
- 3. To provide a tool to assist with integrating the financial planning of growth related capital costs (10-Year Capital Budget Forecast) with land use planning and the timing of development in new growth areas.
- 4. To address how growth will proceed over the long term in conjunction with the long term fiscal growth model and to maintain control over the City's exposure to the underlying costs of growth.

		_
		 _
		 _
		_
		_
		_
		_
		_
		_
		_
-		_
		_

- 5. To ensure an adequate supply and mix of housing units consistent with the goals and objectives of the Official Plan and to ensure a minimum three year supply of residential units in draft approved and registered plans to satisfy the housing policies of the Provincial Policy Statement.
- 6. To monitor the rate and timing of growth in keeping with Places to Grow densities for the Greenfield area and in meeting the intensification target.
- 7. To ensure that the proposed rate and timing of growth is consistent with current Council endorsed population projections.
- 8. To assist the development industry and Boards and agencies involved in development (School Boards, Guelph Hydro) by providing growth and staging information for the City.

The DPP provides information to the development industry, individual landowners and the general public about the priorities for current and future residential and industrial development.

The DPP is also prepared in accordance with the policies of the City of Guelph Official Plan, in particular Section 4.2.3, which states:

"The City will undertake a strategic review of its growth management objectives and policies. As an interim step, a development priorities plan will be prepared that will assist in defining the rate, timing and location of development and redevelopment that should occur in the Municipality. This plan prepared and updated on an annual basis, will provide a multi-year forecast of growth."

By approving the 2008 DPP, City Council will set a limit for the creation of potential dwelling units from Registered Plans from October 31, 2007 to October 31, 2008 (see **Schedule 2**). Staff will manage the registration of the various subdivisions identified for 2008 in keeping with the approved dwelling unit target. Further, Council will also identify those Draft Plans of Subdivision (or phases) that are anticipated to be considered for Draft Plan Approval (DPA) in 2008 (see **Schedule 3**). Staff will allocate time and resources to resolving issues associated with these draft plans so that they may be considered for DPA by Council in 2008.

City Council sets a limit on the creation of potential dwelling units through the approval of the annual DPP.

The sections that follow explain the criteria used by Staff for determining the priority of subdivisions and provide an explanation for the DPP schedules. This document also outlines the flexibility clause and the process to advance the registration of a subdivision (or a particular phase) into the current year.

2 CRITERIA FOR DETERMINING THE PRIORITY OF SUBDIVISIONS

The DPP annually approves the subdivisions (or phases), already Draft Approved, that may be registered. The plan also identifies the preliminary plans of subdivision that staff intend to present to City Council for consideration of Draft Plan Approval in the short term. A number of factors have been considered in determining the priority for Registration and Draft Plan approval.

The factors influencing the support for a Registration include:

- Location of plan within the 'Built Boundary' (currently still draft) or 'Greenfield' areas of the City as per the Growth Plan for the Greater Golden Horseshoe;
- Any required Capital works have been approved in the 10 year Capital Forecast;
- Appropriate Phasing Conditions have been fulfilled (e.g. approval of an EA);
- Proximity of servicing (e.g. end of pipe versus need for a service extension);
- Servicing capacity (water and waste water);
- The realization of the goals, objectives and policies of the Official Plan (e.g. design, layout etc.);
- The objective of balanced community growth in all three geographic areas (NW, NE and South);

			į
•			
-			
			į
-			

- The provision of Community benefits (e.g. the addition of parks and school sites);
- Commitment by the Developer (e.g. signing of Engineering Services agreement, posting of Letters of Credit);
- Status and complexity of Draft Plan conditions and timing to fulfill (e.g. need for Environment Implementation Report);
- The variety and mix of housing units being provided;
- Consideration of the City's Growth Management objectives (an average annual growth rate of 1.5 %) and Population Projections; and
- Review of Staff resources.

The factors influencing the consideration of Draft Plan approval are:

- Conformity of the plan to the density targets of the Growth Plan for the Greater Golden Horseshoe;
- The status of relevant Community, Secondary Plans or Watershed Studies;
- · Conformity with the Official Plan and any applicable Secondary or Community Plan;
- Community Energy Plan considerations;
- The need for growth to maintain a minimum 3-year supply of dwelling units in Draft Approved and Registered Plans;
- The need and status of required Capital works in the 10 year Capital Forecast;
- Servicing capacity (water and waste water);
- Council's approved "Phasing Policy for New Large-Scale Residential Plans of Subdivision";

-		
-		

- The objective of balanced community growth in all three geographic areas (Northwest, Northeast and South).
- Complexity of issues and the time necessary to resolve them (e.g. environmental impact, neighbourhood concerns); and
- Review of Staff resources.

3 EXPLANATION OF SCHEDULES IN THE DPP

The Development Priorities Plan Report 2008 – Post 2009 is comprised of several schedules with development activity statistics for the City of Guelph. In most cases the tables are divided into three geographical areas of the City, "Northwest", "Northeast" and "South", that correspond with the geographical areas that were used for the Population Projections Report ("City of Guelph Household and Population Projections 2001-2027). Guelph City Council approved this study in May 2003. The Population Projections Report contemplated an average annual growth of approximately 1000 dwelling units per year from 2001 to 2006, 900 dwelling units per year for the years 2007- to the end of 2010 and 650 units from 2011 to 2027. It was also assumed that the growth would occur 17% in the northwest, 37% in the northeast and 46% in the south to meet the objective of providing balanced community growth.

The Schedules are described in detail below:

Schedule 1: Registration Activity between October 31, 2006 and October 31, 2007.

This Schedule reports on the subdivisions that were registered in the period October 31, 2006 to October 31, 2007. It also compares the potential dwelling unit totals against the approved DPP registration target for the same time period (in this case the 2007 DPP). When a plan of subdivision is registered, the number of potential dwelling units created by

Based on population projections, Guelph is expected to grow at an annual rate of 900 dwelling units per year for the period 2006-2011.

the registration of the plan are added to the short-term supply of dwelling units (see **Schedule 7**).

Registration activity will not exceed the approved DPP dwelling unit target unless authorized by Guelph City Council.

The plans that were registered between October 31, 2006 and October 31, 2007 are divided into three geographic areas of the City. The unit counts are potential dwelling units and are not indicative of building permit activity (this information is provided on **Schedule 5**). The table shows the number of dwelling units that could be created if the registered plans were fully built out in accordance with the maximum number of dwelling units permitted in the approved zoning.

Through the approval of the 2007 DPP, 1087 potential units could have been registered in 2007. Schedule 1 displays that 8 plans of subdivision (or phases) achieved registration in 2007 or executed a subdivision agreement. These plans provide a total of 959 potential dwelling units; 73% of the units are detached or semi-detached and 27% are multi-residential units. 58% of the registration activity occurred in the Northeast and 42% in the South. On average, 1000 units have been registered each year since the inception of the DPP.

Schedule 2: Summary of 2008 – Post 2009 Proposed Staging, Dwelling Unit Targets.

This Schedule summarizes the staging of development for plans of subdivision for the years 2008, 2009 and post 2009. This schedule also provides a breakdown of all of the dwelling units that could result from Draft Approved and Preliminary Plans of Subdivision as of October 31, 2007.

The portion of the table entitled "2008 Proposed Registrations" is the recommended dwelling unit limit that City Staff are recommending City Council to approve for the year 2008. The recommendation for the 2008 DPP is a total of 1059 potential units in 10 plans of subdivision; two plans do not contain any residential units (23T-03507 Pergola

Schedule 2 of the DPP displays the recommended dwelling unit limit for 2008.

commercial and 23T-03501 Hanlon Creek Business Park. This recommendation would result in 30% of new development in the Northeast, 15% in the Northwest and 55% in the South.

The portion of the table entitled "2009 Anticipated Registrations" is a summary of the likely registration activity in the year 2009, based on input received from the Development Community and Staff's assessment of the criteria for determining the priority for subdivision registration. This portion of the Table is not a commitment for registration during 2009 because the DPP is approved on an annual basis and provides a Council commitment for the next year only (in this case 2008). It is, however, Staff's best estimate of the plans that could be registered during 2009. **Schedule 2** shows that 1179 units are anticipated to be registered in 2009.

The final portion of the table entitled "Post 2009 Anticipated Registrations" summarizes the potential dwelling units within all remaining plans for subdivision that have received Draft Plan approval or have been submitted on a preliminary basis to the City. There are approximately 4534 potential units in proposed plans of subdivision that are projected to be registered post 2009. Approximately 1106 units (24%) are in draft approved plans, 3428 units (76%) are in preliminary plans. Development from these plans is 33% in the Northeast, 19% in the Northwest and 48% in the South.

Schedule 3: Draft Plan Approval Activity

This schedule provides information on current and future Draft Plan approval activity in the City. The table entitled "Plans Anticipated to be considered for Draft Plan Approval in 2008" highlights the draft plans (or phases) that staff expect will be ready to be considered by Council during 2008. Inclusion in this table does not guarantee that the plan will be presented to Council for consideration of DPA in 2008 nor does it commit Council to approving all, or any portion, of the plan. Staff will however allocate time and resources to evaluating the application and resolving issues associated with these draft plans so that they can be considered for DPA by Council in 2008. 6 residential plans of

Schedule 3 displays the plans that are anticipated to be considered for Draft Plan approval by Council in 2008.

subdivision are included in this table with a total of 1119 potential units (54% detached and semi-detached and 46% townhouse and apartments).

The table entitled "Draft Approved Plans during 2007" shows plans of subdivision (or phases) that received Draft Plan approval by Council during 2007. Two plans of subdivision were draft approved in 2007 resulting in 98 units (35% detached and semi-detached and 65% townhouse and apartments). Through the 2007 DPP, Council supported a total of 675 units to be brought forward for consideration of draft plan approval in 2007.

Schedule 4: Development Priorities Plan, Draft Approved and Preliminary Plans

This schedule consists of three (3) components and provides the details that generated the Summary provided in **Schedule 2**. The three components include:

- 1. A table showing the total number of potential dwelling units in Draft Approved and Preliminary Plans of Subdivision by geographic area of the City. (Please note the total number of dwelling units provided on this chart are the same as the total found on Schedule 2).
- 2. Tables showing the detailed land use breakdown of the individual Draft Plans of Subdivision by geographic area of the City. The headings and information provided in these tables are described in more detail in **Section 4** of this report "**Explanation of Columns and Headings**".
- 3. Map of the City providing a visual presentation of the recommended priority and timing for the plans of subdivision.

Schedule 5: Building Permits for New Residential Units

This table shows building permit activity for the last two years. The data for 2007 is reported to year end. Permit activity has declined recently from a record high of 1495 units in 2004 to

Schedule 4 provides the detailed breakdown of plans of subdivision and expected timing of development. 836 units in 2006. As of October 31, 2007, 823 permits have been issued within the entire City. It is anticipated that year end permits for 2007 will be slightly higher than 2006.

Schedule 6: Residential Construction Activity

This chart shows residential construction activity in the City of Guelph over the last 20 years (1986-2007). **Schedules 5 and 6** are used by City Staff to monitor the number of units constructed in the City by year. Registration activity is a measure of the supply of potential units. Construction activity is a measure of the demand or absorption of the units that were previously registered in plans of subdivision and/or available through other infill sites. The Population Projections Report and the Development Charges Study both assumed that the City would grow at a rate of approximately 1000 dwelling units per year for the years 2001 – 2006, 900 units per year from 2007 to end of 2010 and 650 from 2011 to 2027. Upon completion of the Local Growth Management Strategy, the population projections that are used for the DPP will be changed to reflect those approved through the Growth Strategy.

The average permit activity from 2001 to 2006 for the entire City is 1000 units per year (not including accessory apartments) which is exactly what the Population Projections study had contemplated.

The building permit activity for the first 10 months of 2007 (745 units) projects to a year end total of approximately 894 units (not including accessory apartments) per year for the entire City which is consistent with the 900 units per year contemplated by the Population Projections study.

The twenty (20) year average (1987 -2006) for building permit activity is 874 units per year (not including accessory apartments) or 904 units per year (including accessory apartments).

The ten (10) year average (1997-2005) is 980 units per year (not including accessory apartments) or 1040 units per year (including accessory apartments).

Notes:		

Schedule 7 Table 1: Potential Development Summary – Short, Medium and Long Term

This table displays the potential dwelling units in three time frames: Short, Medium and Long Term. The short term supply includes lots and blocks that are registered and where building permits are readily available. The medium term supply includes lots and blocks in Draft Approved Plans that have not been registered. Long term supply includes lands designated for development where staff is reviewing preliminary plans or unofficial proposals. The Provincial Government, in its Provincial Policy Statement (PPS), requires a municipality to maintain at all times where new development is to occur, land with servicing capacity sufficient to provide at least a three-year supply of residential units available through lands suitably zoned to facilitate residential intensification and redevelopment and land in draft approved and registered plans (short and medium term). The current figures indicate that as of October 31, 2007, the City has approximately 5675 potential dwelling units in these draft approved and registered plan representing approximately a 6.3 year supply of growth, based on the growth projections.

A part of a commitment with the approval of the 2007 DPP, this table also provides a summary of infill townhouse and apartment sites in the City available for facilitate residential intensification and redevelopment as required by the PPS. These sites have approved zoning (in some cases with a holding zone) and located outside of registered plans. If built out these sites could supply an additional 1206 multiple residential dwelling units and increase the available supply to 7.6 years.

Schedule 7 Table 2: Building Permits and Vacant Lots by Registered Plan of Subdivision

This table provides a listing of permit activity by Registered Plan of Subdivision together with information on the unconstructed units available to be built within each plan. Each of the subdivisions is identified as being within the Built Boundary or Greenfield areas as defined by the Provincial Growth Plan. The table also provides information on the percentage of permits issued from registered plans within the built boundary and Greenfield areas and the percentage of unconstructed units within the two areas. For 2007,

Currently, the City of Guelph has approximately a 6.3 year supply of units in draft approved and registered plans; down from a 7 year supply in 2006.

Notes:		
		

approximately 45% of the building permits from new subdivisions were issued within the Built Boundary. Further, approximately 71% of the unconstructed units were located within the built boundary. Most of these unconstructed units are contained within vacant multiple residential sites (Townhouses and Apartments). The Provincial Growth Plan requires that 40% of new development occur within the Built Boundary by 2015 and for every subsequent year thereafter.

Schedule 7 Map 1: Remaining Units by Registered Plan of Subdivision

This map presents a visual presentation of the location of unconstructed units by Registered Plan (61M Plans) presented in Schedule 7 Table 2.

Schedule 7 Map 2: Infill Townhouse and Apartment Sites

This map presents a visual presentation of vacant infill townhouse and apartment sites not included in Registered Plans of subdivision. These sites are considered to be part of the short term supply of unconstructed units.

Schedule 8: Update on Water and Waste Water Flows

The City of Guelph allocates physical water and wastewater capacity at the time of registration as per an agreement with the Ministry of the Environment (MOE). With respect to draft plan approvals, the City must ensure that the planning commitment for sewage treatment capacity does not exceed the assimilative limits of the Speed River approved in 1998 as part of the Wastewater Treatment Strategy Schedule "C" Class Environmental Assessment. Environmental Services is in the process of updating the 1998 Class EA to confirm the ability of the Speed River to receive a 9,000 m³/day expansion in flow from the existing wastewater treatment plant.

Similarly, the City must ensure that the long-range water supply commitments to draft plans are below the rated capacity. Environmental Services recently completed and Council

approved the Water Supply Master Plan in principle to the year 2010. Climatic conditions, well interference and water quality influences are impacting upon the yield of the existing municipal water supply. The goal of the Water Supply Master Plan is the provision of an adequate and sustainable supply of water to meet the current and future needs of all customers. In September, 2007, the City received approval from the MOE of an Environmental Assessment (EA) to increase the water taking at the Arkell Spring Grounds by approximately 9,200 m³/day. With the EA approval, it is expected that a portion of this increased water supply capacity will be commissioned by late 2008. The EA also recommends implementation of conservation and efficiency strategies to ensure the best use of the City's existing water resources. In the past five years, conservation, efficiency and reduced sewer inflow/infiltration have allowed development to occur without significantly increasing annual water supply or wastewater treatment flows.

In addition to the water and wastewater capacity expansions proposed above, Environmental Services is in the process of developing a long term Wastewater Treatment Master Plan to address the needs of development in Guelph for the next 50 years. This master plan, in conjunction with the Water Supply Master Plan, will form part of the Local Growth Strategy which has been commenced by Community Design and Development Services.

The tables in **Schedule 8** provide the latest information on Water and Wastewater capacity. The tables are updated and included in the Development Priorities Plan on an annual basis. On an individual draft plan of subdivision application basis, staff will continue to confirm that the subdivision application is consistent with the approved Development Priorities Plan and therefore, the subdivision application would fall within the water and wastewater capacity criteria shown on the tables included in the approved Development Priorities Plan for the current year.

-		

Schedule 9: Total Draft and Registered Plan Analysis

This schedule illustrates the relationship between the current supply of Draft Approved and Registered units in comparison to projected annual take up which is based on population projections.

Schedule 9 displays a 4 year supply of detached and semi-detached units, a 5.9 year supply of townhouse units and a 13 year supply of apartment units in draft approved and registered plans. The Populations Projection Study determined a supply of 900 units per year for the years 2006-2010 consisting of 495 (55%) detached/semi-detached, 225 (25%) townhouses and 180 (20%) apartments. This breakdown of unit types will be revised to reflect the recommendations of the Local Growth Management Strategy upon its approval.

4 EXPLANATION OF COLUMNS AND HEADINGS IN SCHEDULE 4

The following is an explanation of the columns and headings found in the tables featured in Schedule 4. Schedule 4 is broken out into geographic areas of the City; Northeast, Northwest and South.

FILE NUMBER (DESCRIPTION)

The City file number and subdivision name are provided for each proposed plan of subdivision (e.g. Northeast Residential, 23T-98501, Watson East). (NB: the files are listed in chronological order from oldest to most recent).

STATUS

The files/subdivisions are either:

- 1. Draft Approved (City Council has approved).
- 2. Preliminary (Formal applications have been received and are being reviewed by City Staff).

3. Future (Unofficial Proposals have been received by City Staff, but no formal application has been made).

No development will be identified in the DPP until, at least, an Unofficial Proposal has been filed with the City.

RESIDENTIAL

The number of potential dwelling units from the residential portion of a subdivision, yet to be registered, is presented in four columns:

D = detached dwellings
 SD = semi-detached dwellings
 TH = townhouse dwellings*
 APT = apartment dwellings*

COMM, IND, INST,

The land area (in hectares) within plans of subdivision zoned or proposed for Commercial (COMM), Industrial (IND) and Institutional (INST) land uses.

PARK

The land area (in hectares) within plans of subdivision that is zoned for Parkland or is proposed to be dedicated to the City for Parkland. The phrase "Cash-in-lieu" is listed for those plans of subdivision where the City expects to receive a cash payment in lieu of a land dedication for parkland purposes.

		_
		_
		_
		_
		_
		_
		_
		—
		_
		_

^{*} The dwelling unit numbers for Townhouse and Apartment dwellings is based on the maximum densities permitted by the Zoning By-law. The actual number of dwelling units eventually built on individual properties is usually less than the maximum densities allowed.

DRAFT PLAN APPROVAL DATE

For "Draft Approved" plans, the date listed is the actual date of Draft Plan approval. For "Preliminary" and "Future Plans" the date listed staff's expectation of when that the plan of Subdivision may be presented to Council for consideration of Draft Plan approval. This year is not a commitment by Staff nor does it guarantee that City Council will support the plan in whole or in part. The year provided is an estimate by staff of when the subdivision will be ready to be reviewed by City Council after considering the factors influencing the consideration of Draft Plan approval. Schedule 3 provides a summary of the Draft Plans (or phases) that are anticipated to be considered for draft plan approval in 2008.

DC EXPENDITURE/REVENUE

This column lists the expected revenue and expenditures from the hard service component of Development Charges (DCs) to construct the plan of subdivision. The DC revenue is based on the current rates. The DC expenditures are based on capital works for hard services (roads, sewers, and wastewater treatment plant expansion) directly attributable to the plan of subdivision. For larger capital works (e.g. road improvements, wastewater treatment plant) the expenditures have been allocated as a percentage of the benefiting landowner or on a per unit cost.

EXPECTED DEVELOPMENT

This column identifies the priority for registration given to the plan of subdivision or phases of the plan. The year in which the plan of subdivision (or phase) is likely to be registered and the potential number of dwelling units are shown. The individual plan will either be identified as 2008, 2009 or Post 2009. The information from this column is used to create the Summary Table in **Schedule 2**. The timing and phasing is also consistent with the map provided at the end of **Schedule 4**.

The expected development is reviewed on an annual basis and adjusted accordingly.

-		
-		
-		
-		
-		
-		

5 FLEXIBILITY

Subdivisions that are scheduled and approved to be registered in 2008 may not necessarily proceed. In some cases, registration does not proceed as the developer/owner may decide that the market conditions do not dictate the risk to service a particular development. In other cases, the time to clear various conditions (e.g. preparation and approval of a necessary Environmental Implementation report) may have been underestimated. Under these circumstances the DPP flexibility clause allows for development not currently approved to be registered in 2008 to be advanced. City Staff have the authority to move the registration of developments ahead (e.g. from 2009 to 2008) provided that the dwelling unit target will not be exceeded and any capital expense is already approved in the capital budget. The flexibility clause is applied using the following procedure:

- 1. Evaluation of the registration status of plans of subdivision that are included in Schedule 4 for registration in the current DPP by the City Engineer and the Manager of Development and Parks Planning on or before June 30;
- 2. Re-allocation of unit counts from developments that have not signed and registered a subdivision agreement and posted a letter of credit by July 31; and
- 3. Consultation with developers who have submitted Engineering drawings for review and are prepared to sign a subdivision agreement but not included in Schedule 4 of the DPP for the current year to ascertain their ability to move forward on or before July 31.

Council approval is required if the requests for advancement will exceed the dwelling unit target or there is an impact on the capital budget. Under this scenario, Staff will review the request and prepare a report and recommendation to the Community Development and Environmental Services Committee of Council.

City staff meets quarterly with the Guelph Development Association and the Guelph and District Homebuilders to review the status of all development in the DPP and identify instances where the flexibility clause may be used.

6 SUMMARY OF DEVELOPMENT ACTIVITY IN 2007

"Stable" is the best way to describe subdivision and building permit activity for the year 2007. A historic high was set in 2004 when 1495 permits were issued. During 2005 and 2006, building permits were slightly below the 20 year average of 874 permits (not including accessory apartments). As of the end of October 2007 a total of 745 permits (not including accessory apartments) have been issued for new dwelling units (see **Schedule 5**). The average permit activity from 2001 to 2006 for the entire City is 1000 units per year (not including accessory apartments) which is exactly what the Population Projections study had contemplated. The building permit activity for the first 10 months of 2007 (745 units) projects to a year end total of approximately 894 units (not including accessory apartments) per year for the entire City which is consistent with the 900 units per year contemplated by the Population Projections study.

The reduction in permit activity over the last three years is consistent with other area Municipalities and seems to reflect a general weakening in demand in the residential marketplace. The Canadian Mortgage and Housing Corporation (CMHC) expects that rising home prices, greater choice in the resale home market and less than robust labour markets in the Kitchener and Guelph area will keep housing starts below the record highs recorded in the early 2000's. Single detached housing starts are expected to trend lower in 2008 but detached homes are expected to continue to be the product of choice for homebuyers. In the long term, the focus is expected to shift toward higher density forms of housing due to the Places to Grow Act focus on more compact development and the ageing population's demand for smaller units.

Recent permit activity has continued to see a balanced supply of a full range of housing forms including townhouses and apartments. In 2005, 337 permits were issued for new townhouse and apartment dwellings representing approximately 39% of the total dwelling units; and in 2006, 331 permits (40%) were issued for multiple forms of residential accommodation. To date in 2007, 379 permits (49%) were issued for townhouses and apartments. These figures are consistent with the policy of the City that encourages at least 40% of the dwelling units to be multiple residential forms (includes townhouses, apartments and accessory apartments).

Building permits for 822 new dwelling units were issued by October 31, 2007.

Registration activity was on track with the figures established in the 2007 DPP. Of the 9 registrations proposed for 2007, 2 plans were fully registered while 7 plans signed subdivision agreements allowing the commencement of servicing. The flexibility clause was used in 2007 to move the registration of Victoria Gardens Phase 3 ahead into 2007. The registration of Mitchell Farms Phase 2 and Arkell Springs Phase 2 were delayed thereby allowing the units reserved for their registration to be transferred to other plans. These two plans are included in the allocation of units for registration in 2008. The nine (9) plans of subdivision that were registered in 2007 will result in the potential creation of 959 dwelling units. This overall figure is slightly less than the 1087 dwelling units that were supported for registration by City Council (see **Schedule 1**). Registration activity in the **south** end included the third phase of the Westminister Woods East subdivision (61M-143), the third phase of Victoria Gardens and nine lots on Edinburgh Road South for a total of 398 potential units. Registration activity in the **east** end of the City included Phase 5 of the Watson East subdivision, the first phase of the Morning Crest (Almondale Homes) subdivision, phase 3 of Ingram, phase 4B of Grangehill and phase 2 of Northview for a total of 561 potential units. There was no registration activity in the **west** end of Guelph in 2007.

The 2006 DPP was the first year that a schedule for plans of subdivision seeking Draft Plan approval (DPA) formed part of the DPP. This inclusion responded to a new policy supported by Council dealing with the phasing of new large-scale residential subdivisions. The policy requires that draft plan approval of residential subdivisions containing more than 200 potential dwelling units or greater than 10 hectares in area be brought forward for consideration in a logical phase or phases in keeping with the approved DPP. In 2007 Council directed staff to reduce the proposed number of potential units in anticipated draft plan approvals to 675 in an attempt to reduce the inventory of units in draft and registered plans of subdivision. In keeping with this direction, staff identified 6 plans of subdivision with a total of 526 potential units for consideration of draft plan approval in 2007. Only 2 plans of subdivision were granted draft plan approval in 2007. This added 98 potential dwelling units to the medium term supply of potential dwelling units in the City. These plans include the redline amendment to the Watson East subdivision and Walkover lands (23T-06501) and the nine lot subdivision at 974 Edinburgh Road South. **Schedule 3** provides a summary of all of the plans that achieved Draft Plan approval in 2007.

A phasing policy for subdivisions was approved in 2005.

One plan of subdivision was granted an extension to draft plan approval in 2007 to allow time to complete the plan. The Victoria Gardens subdivision received a 3 year extension to September 27, 2010.

7 FORECAST OF SUBDIVISION AND PERMIT ACTIVITY FOR 2008

Building permit activity in the residential sector is relatively uncertain. Like other Ontario cities, Guelph has experienced a reduction in residential permit activity in the past couple of years from the record high level set in 2004. There was a significant reduction from 2004 to 2005 (-42%) and a slight reduction again from 2005 to 2006 (-3%).

In Guelph, the permit activity for 2007 was forecast to be consistent with or slightly less than the activity experienced in 2006 (837 new dwelling units). As of October 31, 2007 it was apparent that permit activity was going to be slightly higher than that achieved in 2006.

The permit activity is expected to continue to include a full range of dwelling units including detached, semi-detached, townhouse and apartment construction. The range and expected number of new permits is consistent with the City population projections study and the City's objective to provide a variety of housing options to meet the diverse housing needs within the community.

Interest in obtaining draft plan approval and registration of various subdivisions remains strong. At the outset of the annual DPP review in August 2007, City staff received requests from the development community to register approximately 2100 potential dwelling units during 2008. The circulation of the draft 2008 DPP in October 2007 resulted in the development community's understanding of staff's proposed registration timing and there were no additional requests made to modify staff's recommendation for registrations in 2008. Staff's recommendation of a total of 1059 potential units for registration in 2008 is based on the objectives of the DPP and the following:

1. Council's approved growth rate of approximately 900 units per year as set out in the population projection targets.

Building permit activity has decreased since 2004; this decrease is not unique to Guelph.

Notes:			

- 2. The impact of the Provincial Places to Grow legislation and Growth Plan for the Greater Golden Horseshoe that places requirements on where future growth needs to occur (see discussion in Section 8).
- 3. The need to take a more conservative approach to approvals and registrations to ensure that anticipated capacity upgrades in the water and waste water systems are fully operational (see discussion in Section 3)

Requests to register all or parts of 10 subdivisions are contained within the recommended dwelling unit target of 1059 dwellings contained on **Schedule 2** for the 2008 DPP (see Section 10 Conclusions and Recommendations) Four (4) registrations are expected in the east, five (5) in the south and one (1) in the west. Included within this recommendation are three plans of subdivision that were expected to be registered in 2007; Mitchell Phase 2, Kortright East Phase 2 and Arkell Springs Phase 2. While this number (1059 potential units) exceeds the current population projection forecast of 900 units per year, it reflects that 335 potential units are contained within 3 apartment blocks scheduled to be included in the various registrations. There are only 424 potential detached or semi-detached dwellings included in the overall target.

Staff expect that six (6) preliminary plans of residential subdivision are likely to be ready to be presented to Council for consideration of Draft Plan approval in whole, or in part, during 2008 (see **Schedule 3**). The subdivisions (or parts thereof) that may be considered for Draft Plan approval in 2008 include a total of approximately 1119 potential dwelling units. This number reflects that there is a considerable backlog of subdivisions (both within the built boundary and in the Greenfield areas) waiting for consideration of Draft Plan approval. Our recommendation, for example, reflects the potential units that did not achieve draft approval in 2007. The 2007 DPP identified that 675 potential units could brought forward for consideration in 2007 but only 98 potential units actually were approved by City Council. Therefore, 577 potential units were carried forward into 2008 and form part of the 1119 units which could be considered for Draft Plan approval in 2008. The limited number of plans that achieved Draft Plan approval and the healthy permit activity has reduced the overall supply of potential units in the short and medium term (within plans of subdivision) to a 6.3 year supply, which is the lowest in the history of the DPP. Even if all of the plans were able to be presented to Council for consideration of Draft Plan approval and did, in fact, get approved, the two

year average for draft plan approvals would be 608.5 units (1217 divided by 2) which is still less than the current population project forecast of 900 units per year.

The number of plans highlighted for consideration is considerably less than the requests received by the development community. The recommendation also reflects the need to ensure that growth is consistent with Council's population projection target of 900 units per year. This recommendation of considers the implications of the Growth Plan for the Greater Golden Horseshoe (see Section 8) where less emphasis, in future, will be placed on Greenfield development.

8 IMPLICATIONS OF THE PROVINCIAL GROWTH PLAN AND THE FUTURE OF THE DPP

On June 16, 2006 the Province released the Growth Plan for the Greater Golden Horseshoe, 2006. This plan was prepared under the Places to Grow Act, 2005 as part of the Places to Grow initiative to plan for healthy and prosperous growth throughout Ontario. The new growth plan has significant implications for the future development of the City. Since the first DPP was prepared, it has been used effectively as a tool by City Council to manage the rate and timing of development from new plans of subdivision. As a result, City staff view the DPP as the logical tool to be modified to monitor the City's obligations under the Growth Plan for all development in the City. Of particular interest is that the Growth Plan establishes intensification and density targets for certain areas within municipalities. The Growth Plan also establishes population and employment projections for Guelph. The following discussion highlights some of the obligations under the Growth Plan and recommendations by City Staff on how the DPP could be modified to monitor these obligations.

Intensification Target

The Growth Plan establishes that single tier municipalities (like Guelph) will plan for a phased increase in the yearly percentage of residential intensification so that by the year 2015 generally a minimum of 40% of all new residential units occurring annually within each municipality will be within the defined built up area. The Minister of Public Infrastructure Renewal may review and permit an alternative minimum intensification target for a single-tier municipality located within the

		-
		-

outer ring to ensure that the intensification target is appropriate, but it is expected that this requirement will impact the consideration of future development within the City.

On November 20, 2007, the Ministry of Public Infrastructure Renewal released the "Proposed Final Built Boundary for the Growth Plan for the Greater Golden Horseshoe" but at this time it is still considered to be Draft.

In 2007 a number of changes were recommended to the DPP to incorporate monitoring of the implementation of the Growth Plan. These include:

- ♦ The mapping for the 2008 DPP (Schedule 4) will clearly identify the built boundary.
- ◆ Building permit statistics (Schedule 5) will continue to show an overall City total but also be broken into permits within the defined "Built up" area and designated "Greenfield" area to monitor the percentage of new development within the two areas.
- ♦ The Schedules and mapping for the 2008 DPP will be modified to show all potential residential developments (infill and subdivisions) within the "Built up" and "Greenfield" areas to provide an inclusive inventory of potential residential units in both areas.

Staff have been able to achieve these recommendations within the 2008 DPP. The Draft Built boundary is identified on Schedule 4 and on Maps 1 and 2 of Schedule 7. In Schedule 5 and Schedule 7 (Table 2) of the 2008 DPP, permits have been identified as being within the Built Boundary or the Greenfield area of the City based on the Proposed Final Built Boundary provided by the Province. Schedule 5 also displays the percentage of overall permits that were issued for each area. Of note, is the fact that approximately 45% of building permits issued in 2007 were within the Built Boundary. In addition, approximately 71% of the remaining undeveloped units within registered plans are also within the Built Boundary. Further, Schedule 7 (Tables and Maps) have been adjusted to provide an inclusive list of potential units from currently approved projects (infill and subdivisions) to provide a current inventory of potential residential units within the City. This is by no means the total potential units as the Local Growth Management strategy will outline this potential supply.

Further, the strategy for achieving the intensification target will be developed through the Local Growth Management Strategy. Upon approval of the strategy, the DPP will act as the monitoring tool for achievement of the intensification targets.

Density Targets

The Growth Plan also specifies a set of density targets for the identified Urban Growth Centre (i.e., the downtown area) and the designated Greenfield area. The City of Guelph is one of the identified municipalities where a minimum density target (in this case 150 people and jobs per hectare) is to be achieved in the Urban Growth Centre. Similar to the establishment of the Built Boundary, the Ministry of Public Infrastructure and Renewal has met with City Staff concerning the establishment of the boundary of the Urban Growth Centre in Downtown Guelph. This boundary has not yet been finalized.

The Growth Plan requires that the density target for the whole of the designated Greenfield area is to be not less than 50 residents and jobs combined per hectare. The density target is to be measured over the entire designated Greenfield area, not by individual project, and excludes provincially significant wetlands where development is prohibited. Census data, released every five years, will be used to monitor progress towards achieving the targets, although municipal data is expected to be used to supplement the census to obtain a count of jobs and residents that is as accurate as possible.

The following changes were recommended to future Development Priority Plans:

- ♦ The Mapping for the 2008 DPP will identify the Urban Growth Centre Boundary and the Built Boundary. It will also provide a density estimate for the areas based on the most recent census information as supplemented by municipal data.
- ♦ Schedule 4 will provide the density estimate for all draft approved plans within the designated Greenfield area based on the land use schedule for each draft approved plan.
- ♦ A density estimate for all new Draft Plans of subdivision recommended for consideration in 2008 in the Greenfield area will be provided based on the information available at the time of publication of the DPP (**NB**: **As noted in**

Section 4, Draft Plans of subdivision identified for consideration by the DPP does not commit Council to approving the plan in whole or in part. As the most appropriate time to review and establish future densities is at the time of Draft Plan approval, individual plans showing less than the density target will have to be modified to achieve the target).

Staff continue to work toward incorporating these commitments into the DPP. The Urban Growth Centre was not mapped for the 2008 DPP, as this boundary has not yet been formally established and discussions are ongoing with the Ministry of Public Infrastructure and Renewal. The DPP will include this boundary when it is formally established.

Staff have also prepared a detailed spreadsheet for all draft approved and preliminary plans of subdivision in the Greenfield area. While this spreadsheet is still draft, for the six plans (6) of subdivision (or phases) anticipated to be considered for Draft Plan approval in 2008 the data indicates a density of approximately 52 jobs and residents per hectare. This is an average of the six plans and, as such, some plans have a higher density and some have a lower density. As noted above, these plans are being reviewed and revised and the best time to establish future densities is at the time of Draft Plan approval. As reports are generated related to the individual applications, staff will ensure that density calculations are provided for Council's consideration. Further, Staff are currently trying to determine the best way of presenting the data to monitor our obligations for Greenfield densities with the publication of future DPPs.

Population Projections

The population projections established by the Provincial Growth Plan are significantly higher for the City of Guelph than the current City projections prepared by CN Watson and approved by City Council in 2003. Further, the projections contained in the Growth Plan must be used for planning and managing growth in the Greater Golden Horseshoe.

The Province is currently undertaking an allocation process for the Wellington County – Guelph area. This, in turn, will help to determine the population growth rate expected for the City of Guelph and Wellington County. Once this allocation process is finished, it will be incorporated into the City's Local Growth Management Strategy and the Official Plan update. The population projections and growth rate approved by City Council, through the Official Plan update, as part of

the Local Growth Management Strategy will form the basis for future Council decisions affecting growth and development. It is also expected that the DPP will continue to be the primary growth management tool to assist City Council in managing the rate and timing of new growth and will take its direction from the Growth Management Strategy once it is approved.

9 CIRCULATION OF DRAFT DPP TO THE DEVELOPMENT INDUSTRY

Staff communicate regularly with representatives of the Guelph Development Association (GDA) to monitor the approved "Development Priorities Plan". Regular quarterly meetings were reestablished during 2005 as part of the Development Application Review (DARP) initiative and the DPP was a regular agenda topic, among a number of issues associated with our development review process.

The Draft 2008 – Post 2009 DPP was circulated to the development community (owners/consultants and agencies) for comment on October 17, 2007. Following release of the draft, City staff met with the GDA representatives on November 15, 2007. At the meeting the GDA discussed several issues including:

- ◆ The Places to Grow legislation and the Growth Plan and the need to show how the DPP will be used to implement the intensification commitments set out in the Growth Plan.
- ◆ Concern about lands designated "Reserve Lands" in the Official Plan becoming solely employment use in the future. Need for a secondary plan for South Guelph.
- ◆ Lack of building lots available in the City; need for mapping indicating where vacant lots are available.

Individual responses received from the owners and consultants concerning the timing of a number of draft and preliminary plans and the DPP in general are included in **Schedule 10**.

A staff response to all of the comments and requests is provided on **Schedule 11**.

10 CONCLUSIONS AND RECOMMENDATIONS

The DPP continues to be an implementation tool for the City's Strategic goal of managing growth in a balanced sustainable manner. During 2007, the DPP was also effective in assisting staff in establishing priorities for the review and approval of new development from residential plans of subdivision.

10.1 Registration Activity

Registration activity in 2007 was on target with the dwelling unit targets set by Council as a limit to growth. The 2007 DDP supported the creation of up to 1087 potential dwellings units from new registered plans and 959 potential units were registered. From 2001 to 2006 a total of 6025 potential dwelling units were registered for an average of 1004 units per year. This is in keeping with the Council approved population projection forecast which called for a growth of 1000 units per year from 2001-2006. Staff will continue to recommend registration activity to reflect the Council approved population projection forecasts. Currently this forecast calls for an average of 900 units per year from 2007 to 2010. The recommendation of 1059 potential units exceeds the current population projection forecast of 900 units per year, but it reflects that 335 potential units are contained within 3 apartment blocks scheduled to be included in the various registrations. It is logical that these blocks are included in the registration. There are only 424 potential detached or semi-detached dwellings included in the overall recommendation.

10.2 Building Permit Activity

Residential building permit activity was stable in 2007. The residential permit activity for 2007, a total of 823 units at the end of October is projected to be slightly higher than the 836 permits issued for new units in 2006. Buoyed by a strong economy, 6004 permits (excluding accessory apartments) were issued for new dwelling units from 2001 to 2006 for a year over year average of 1000 units. This matches exactly the Population Projections endorsed by Council. These projections indicated that the City would grow at a rate of approximately 1000 dwelling units per year for the years 2001 to 2006 and 900 units per year from 2007 to 2011. The year end permits in 2007 are expected to exceed 900 units (including accessory apartments). The 20-year average is 904 dwelling units per year as noted on **Schedule 6**.

10.3 Phasing Policy

The phasing policy (established in 2005) for large scale residential subdivisions is effective in introducing new potential dwelling units at a moderate rate into the medium term housing supply (plans with Draft Plan approval). During 2007, 2 draft plans of subdivision containing 98 potential units received Draft Plan approval (see Schedule 3). In support of Council's direction to reduce the inventory of units in draft approved and registered plans, the 2008 DPP highlights plans (or phases of plans) anticipated to be presented to Council for the consideration of Draft Plan approval in 2008 (see also **Schedule 3**). These are the subdivisions where staff time and resources will be allocated to resolving issues so that they can be considered by City Council. If supported these subdivisions would add a potential 1119 dwelling units to the medium term supply. While this number appears high, it is important to note the lack of draft approval activity in 2007 (only 98 units received Draft Plan approval). The recommendation therefore includes a carry-forward of 577 potential units that were anticipated to be considered for draft plan approval in 2007 (based on Council's approval of 675 potential units). Even if all the units (1119) were to receive Draft Plan approval by Council, the two year average is 608.5 dwelling units, which is less than our current growth projections (900 dwelling units per year from 2007-2010) and will not negatively impact the direction to reduce the medium term supply of units.

10.4 Inventory of Units

A lack of new units receiving Draft Plan approval has reduced the medium term inventory of units from approximately 6300 units in 2007 to 5675 units in 2008. This equates to an overall supply of approximately 6.3 years of growth at 900 units per year (see **Schedule 7**) which is the lowest inventory in the history of the DPP. Through careful management, the medium term supply of dwellings has been reduced from a high of 7600 units in 2003 to the current 5675 units. The medium term supply of low density dwellings (detached and semi-detached dwellings) is now at a 4 year supply; down from a 5 year supply in 2007 while the inventory of townhouses and apartments remains high. Within Draft and Registered Plans there are 3699 potential townhouse and apartment units (approximately 65% of the supply).

For the first time, the DPP has also included an inventory of zoned townhouse and apartment infill sites not included in Draft or Registered Plans. There are 1206 potential townhouse and apartment units within this category. When theses numbers are added the overall short and

medium term supply of units increases to a 7.6 year supply and the townhouse and apartment units include 71% of the available supply. The medium term supply of units within Draft and Registered plans is at the lowest level recorded since the inception of the DPP and the supply of new low density forms of housing (detached and semi detached dwellings) is approaching the minimum requirements (3 year supply) under the Provincial Policy Statement. A managed approach to the introduction of new units is essential in conjunction with long-term water and wastewater capacities.

10.5 Water and Wastewater

An examination of the information regarding water and wastewater treatment flows (see **Schedule 8**) indicates that the City still has capacity to handle the commitments for the future dwelling units currently registered and draft plan approved.

The data indicates that the current wastewater treatment plant has the capacity for the registration of an additional 6850 units of residential development, which equates to 7.6 years of growth based on the population projections. For water, the data indicates a current capacity to register an additional 4000 dwelling units, which equates to a 4.5 year supply. In addition, long range forecasting shows the City has sewage treatment capacity for approximately 12,700 additional residential units and water capacity for 7100 units.

10.6 Recommendations

City staff recommend that the 2008 Development Priorities Plan (DPP) be approved (Schedules 2, 3 and 4) and used as a guide to manage the rate and timing of development for the next year. The 2008 DPP recommends that Council support the creation of up to 1059 potential dwelling units from the registration of plans in 2008 (See **Schedule 2**). This figure is the lowest recommended total since the DPP was created in 2001. The figure also reflects a couple of new realities for new development.

1. The DPP needs to respond to the population projection forecast, which recommends the creation of approximately 900 potential new units from 2007 – 2010. This is down from the 1000 dwelling units per year from 2001 to 2006.

The 2008 DPP recommends support for the creation of up to 1059 dwelling units from the registration of plans in 2008.

2. The Growth Plan for the Greater Golden Horseshoe now generally requires that by the year 2015, 40% of new growth occur within the built up areas of Cities. The final minimum requirement will be spelled out in the final recommendations for the Local Growth Management Strategy following discussions with the Minister of Public Infrastructure Renewal. However, since most of the new subdivision activity identified by the DPP is expected to be identified beyond the built boundary (i.e. Greenfield area) there is the need to take a more conservative approach to Greenfield approvals and commitments to achieve the intensification target.

Included in the 1059 potential units is a carryover of 122 units that were identified for registration in 2007. If these units are removed, 937 new units are included in the recommendation. In the recommendation, consideration was also given to the registration activity in the past two years. In 2007, 959 potential units were registered and in 2006, 648 potential units were registered. The two year average is 800 units per year. Both the number of new units (937) and the average of the past two years are consistent with Council's current population project forecast of 900 units per year.

The breakdown of the components of the 1059 dwelling units is 392 detached, 32 semi-detached, 300 townhouses and 335 apartment units. If these registrations are endorsed, the City will continue to have a sufficient supply of lots and blocks in registered plans to respond to market needs and trends and maintain a competitive market place in terms of pricing. In terms of short-term supply, there are 3058 potential units (as of October 31, 2007) currently available for building permits in registered plans. This overall number is up from last year's DPP (2785 units). The addition of the 1206 potential units in infill townhouse and apartment site pushes this total to 4264 potential units. The majority of potential units in the short term supply, approximately 3044 units (71%) are in potential multiple residential projects (**Schedule 7**).

This year's DPP also recommends a number of plans for consideration of draft plan approval in 2008 (see **Schedule 3**). Included in the plans are approximately 1119 future dwelling units. This relatively large number reflects that only 98 units received Draft Plan approval in 2007. When the units carried forward from last year (577) are discounted, only 542 new units are contained within the recommendation. This is in keeping with the population projection (900 units per year). Again, even if all the units (1119) were to receive Draft Plan approval by Council, the two year average is 608.5 dwelling units, which is also less than our current growth projections (900 dwelling units per

year from 2007-2010) and will not negatively impact the direction to reduce the medium term supply of units.

City Staff have begun make a number of changes to the DPP this year in response to the Places to Grow legislation and our commitments under the Growth Plan for the Greater Golden Horseshoe. Further changes will be incorporated when the Local Growth Management Strategy is finalized.

Schedule 8 2008 DPP Water/Wastewater Firm Capacity

Explanation: This table shows the determination of how many units can be serviced (line 4) after subtracting the actual daily flow used (line 2 a) and 2 b)) and the servicing commitments (line 3) from the total available firm capacity (line 1). Line 5 shows how many units are proposed to be registered in the 2008 Development Priorities Plan and line 6 confirms whether there is capacity available for these units.

		Water	Wastewater
1	Firm Capacity	75,000 m ³ /day	64,000 m ³ /day
2 a)	Average Maximum Daily Flow (water)	64,361 m ³ /day	N.A.
2 b)	Average Daily Flow (wastewater)	N.A.	51,229 m ³ /day
3	Servicing Commitments	5,263 m³/day (3,928 units)	5,454 m ³ /day (3,928 units)
4	Available Servicing Capacity to Register New Dwelling Units (Uncommitted Reserve Capacity)	4,012units	6,852 units
5	Units to be Registered in 2008 based on the proposed Development Priorities Plan	1,059 units	1,059 units
6	Capacity Available	YES (2,953 units)	YES (5,793 units)

Notes

1. Total Available Firm Capacity:

Water - the physical capacity of the constructed water infrastructure to deliver an annual daily flow of 75,000 m³/day of water supply.

Wastewater - the physical capacity of the constructed wastewater infrastructure to deliver an annual daily flow of 64,000 m³/day of wastewater treatment

- 2. a) **Maximum Daily Flow (water)** is the actual maximum daily flow based on the past three year average.
- 2. b) **Average Daily Flow (wastewater)** is the actual average daily flow for wastewater treatment based on the past three year average.
- Servicing Commitments are registered and zoned lots/blocks that could currently proceed to building permit and construction. The figure for servicing commitment for wastewater treatment also includes a total of 1260 m³/day committed to the Village of Rockwood.

Schedule 8 2008 DPP Water/Wastewater Planning Capacity

Explanation: This table shows the determination of how many units can be serviced (line 5) after subtracting the actual daily flow used (line 2 a) and 2 b)), the servicing commitments (line 3) and the draft plan approval commitments (line 4) from the total available planning capacity (line 1). Line 6 how many units are proposed to be draft plan approved in the 2008 Development Priorities Plan and line 7 confirms whether there is capacity available for these units.

		Water	Wastewater
1	Planning Capacity	83,100 m ³ /day	73,300 m ³ /day
2 a)	Average Maximum Daily Flow (water)	64,361 m ³ /day	N.A.
2 b)	Average Daily Flow (wastewater)	N.A.	51,229 m³/day
3	Servicing Commitments	5,263 m³/day (3,928 units)	5,454 m³/day (3,928 units)
4	Draft Approval Commitments	3,881 m ³ /day (2,896 units)	3,093 m ³ /day (2,896 units)
5	Available Servicing Capacity for New Draft Plan Approved Units (Uncommitted Reserve Capacity)	7,161units	12,666 units
6	Units to be Draft Plan approved in 2008 based on the proposed Development Priorities Plan	1,119 units	1,119 units
7	Capacity Available	YES (6,042 units)	YES (11,547 units)

Notes

1. Planning Capacity:

Water - includes the sum of the existing physical capacity of constructed water infrastructure plus additional water pumping certificates of approval, some of which are not currently available. Additional water supply capacity from the approved Arkell Springs Supply EA has been factored in the Planning Capacity shown on this chart.

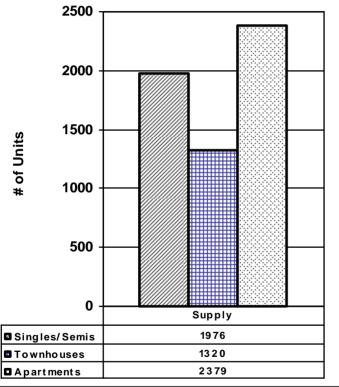

Wastewater - based upon the approved assimilative capacity of the Speed River. Plant expansion to provide an additional 9,000 m³/day of treatment capacity in order to reach the approved assimilative capacity is planned for 2008.

- 2. a) **Maximum Daily Flow (water)** is the actual maximum daily flow based on the past three year average.
- 2. b) Average Daily Flow (wastewater) is the actual average daily flow for wastewater treatment based on the past three year average.
- 3. **Servicing Commitments** are registered and zoned lots/blocks that could currently proceed to building permit and construction. The City provides servicing commitment at the time of lot/block registration in keeping with the agreement with the MOE. The figure for servicing commitment for wastewater treatment also includes a total of 1260 m³/day committed to the Village of Rockwood.

Schedule 9 Total Draft and Registered Plan Analysis

Total Supply 2007

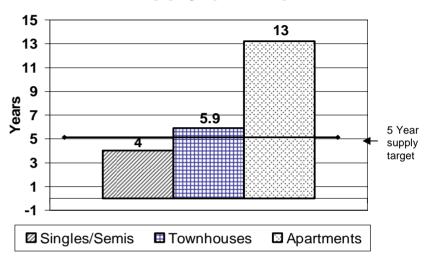

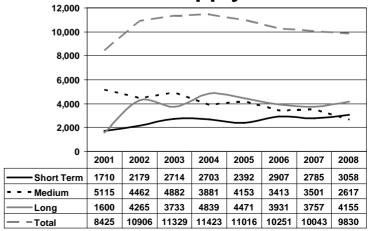

☑ Singles/Semis ■ Townhouses ■ Apartments

Note: Population projections anticipate 900 units per year take up – 495 singles/semis, 225 townhouses, 180 apartments

Supply (Years)

Dear Ms. Castellan

Re: 2008 DEVELOPMENT PRIORITIES PLAN

Further to your letter of October 17, 2007 we have the following comments.

 Page 6 shows Draft Plan Approval for Grangehill Phase 7 in 2008 and expected development post 2009.

We agree with the draft approval timing of 2008, however we request that 50% of the units be allocated for development in 2009.

We would appreciate your confirmation of this request, and thank you for your cooperation.

Yours truly,

Robert L. Hooshley, P.Eng.

Vice-President

Dear Mr. Hearne:

Re:

Revision to Apartment Units within the

Proposed Official Plan Amendment, Zoning Amendment, Draft Plan of Subdivision and Common Element Condominium

Part of the Northeast Half of Lot 5, Concession 8 (Formerly Puslinch Twp.)

1159 Victoria Road South (Victoria Park West Golf Course)

Owner: Diodoro Investments Limited (Ted De Corso)

Further to my letter of July 25, 2007, the owner has been in discussion with a number of builders regarding the development of this site. You will recall that the apartment buildings proposed for this site were to be 3 storeys in height and contain 19 units per building. It has now been decided that a 4-storey building is more appropriate as there will be a need to provide elevators within these buildings and at 3 storeys in height, this becomes a less viable project.

Attached is a revised plan that now shows each apartment building containing 26 units. Although the footprints remain the same with some additional surface parking, we have chosen to modify the plan so that the accompanying "Relevant Information" chart on the face of the plan accurately reflects the unit breakdown.

The project will now contain a total of 210 units with approximately 61% of these units being townhouses or apartment dwellings.

Should you have any questions, please do not hesitate to call me.

Yours very truly

aveci Stoemafica

Subject: Draft DPP 23T-04501

Hi Melissa.

Re: 340 Eastview Road Morning Crest Subdivision

We responded to the draft DPP yesterday by phone call to you and you agreed with us on the following:

- 1) Subdivision referred to as Morning Crest Phase 1, Morning Crest Phase 2 as will be shown on the subdivision sign
- In Schedule 3, "Draft Plan Approval Activity", the error regarding numbers will be corrected. There will be 94 Semi-Detached, 25 Townhouses, Total 352.

Any questions or further discussion, please call or email.

Thanks again.

Regards.

Peter

Attention: Mr. Scott Hannah

Manager of Development Planning

Re: 2008 Development Priorities Plan

Bird Property 1897 Gordon Street

Dear Mr. Hannah:

Because it is likely that this development will include a plus 5-storey building, it will be necessary to put in a water booster station. Therefore, following our review of the draft schedules and mapping for the 2008 Development Priorities Plan, we kindly request that the servicing comments for the Bird Property (City of Guelph Zone change ZC0306) be revised to state the "Development of a portion of the lands will require the construction of either a new water pressure zone or a water booster station." This revision will provide flexibility in the type of development proposed for the site and the engineering servicing design.

We trust this is the information you require at this time. If you have any questions or require additional information, please do not hesitate to call.

Yours truly,

GAMSBY AND MANNEROW LIMITED

Rajan:

Further to our discussion yesterday, the comment in Schedule 4 regarding the Southgate Business Park (23T-0653) should read:

"Development will be dependent on MTO approval for improvements to Maltby Road and the Hanlon Expressway intersection, including upgrading of Maltby from its intersection with Southgate easterly to the Hanlon"

Thanks

Jim Horton

SCHEDULE 11 – Staff Response

Grangehill Phase 7 - 23T-07501

Metrus Development Limited has requested that this phase be identified for consideration of Draft Plan approval in 2008 and registration in part in 2009.

The draft of the DPP circulated for comment in the fall of 2007 included the request for consideration of Draft approval in 2008 but identified registration of the plan "Post 2009". Subsequently staff has altered the final DPP to remove consideration of Draft Plan approval until 2009 while maintaining that registration of the plan in whole or in part will not occur until "Post 2009". Several issues have influenced the staff recommendation including the expectation that changes are needed to the plan to meet the Places to Grow density requirements and further public review will be necessary. This will likely delay consideration of the plan until 2009. Further, this plan is considered to be Greenfield development and the City needs to take a more conservative approach to the approval of Greenfield developments in order to ensure that it meets its intensification targets.

Staff has advised the representatives of this development of this position and the change from the Draft to the Final version of the DPP.

Victoria Park West Golf Course (23CDM05506)

Nancy Shoemaker on behalf of the applicant requested revisions to the unit counts anticipated, based on changes to the apartment building format.

Staff have made the changes requested and would advise that modifications to this development are ongoing.

Morning Crest Subdivision/Almondale Homes – 23T04501

Peter Linke on behalf of the Morning Crest subdivision (340 Eastview Road) indicated some minor oversights in the unit counts for phase 2 of this development. The correct unit counts are now identified in the DPP.

1897 Gordon Street (ZC0306 Krizsan-Bird)

Gamsby and Mannerow requested that the servicing comments for the Bird Property include the need for either a new water pressure zone or water booster station to reflect changes expected to this development to increase the density.

Staff has made the changes requested.

Southgate Business Park (23T-06503)

Astrid Clos on behalf of the owners of the proposal has requested changes to the timing comments to reflect certain road improvements.

Staff has made the changes requested.
